Evergreens

ARBOR VITAE—*T. occidentalis*,—AMERICAN.

A hardy, compact growing evergreen. Unsurpassed as a hedge plant. It may be sheared into almost any conceivable shape. Invaluable for screens, wind-breaks and ornament. Endures the coldest winters and is adapted to a great variety of soils. Arbor Vitae has a dark green color in summer, turning to a rich bronze in winter.

Hedge
and
Sheared
Specimens

BALSAM FIR—*Abies balsamea*.

Adapted to lawn planting. A slender pyramidal tree of rapid growth. The foliage is a dark green and emits a fragrant odor. This tree is widely used as a Christmas tree.

		Each	10	100	1000
Transplanted,	8—12 in.	.09	.35	2.50	20.00

"	3— 4 ft.	.50	4.50
Seedlings,	2— 4 in.50	3.35

HEMLOCK SPRUCE—*Tsuga Canadensis*.

A graceful, hardy evergreen, that deserves more attention. Here is what one authority says: "It would not be exaggeration to pronounce this the most beautiful evergreen in cultivation." It stands shearing well and is not injured by shade.

		Each	10	100	1000
Transplanted,	4—8 in.	.25	1.75	9.00
"	8—12 in.	.35	2.50	15.00
"	12—18 in.	.45	3.00

Hemlock Spruce Hedge.

JUNIPER—*J. communis prostrata*,—AMERICAN.

A hardy creeping plant, seldom exceeding two or three feet in height. It grows in the form of a saucer and in time covers a very large area. Very fine for rockeries and formal plantings.

		Each	10	100	1000
Seedlings,	8—12 in.	.15	1.00	6.25
"	12—18 in.	.27	2.00	12.00
"	18—24 in.	.45	3.00	20.00

PINE—*Pinus Austriaca*,—AUSTRIAN.

The Austrian Pine is a native of Europe. It requires only a moderately fertile soil. In fact it has succeeded on sandy shores and dunes where no other variety would survive. It is a hardy rapid grower and we recommend it both for windbreaks and ornamental plantings.

Austrian Pine.

"	2—3 ft.	.40	3.00	25.00	200.00

JACK PINE—*Pinus Banksiana*,—JACK (*Divaricata*).

While this evergreen is not adapted to ornamental planting it has great value as a windbreak or forest tree where no other kind will grow. In Germany it grows in sand so barren that not even weeds would grow in it. It has succeeded remarkably well in the arid states of the west. The Jack Pine is a very rapid grower, commonly making a growth of two or three feet in one season.

	Each	10	100	1000
Transplanted, 4—6 ft.	.50	3.00	20.00

PINE—*Pinus ponderosa*,—PONDEROSA.

Also known as Western Yellow and Bull Pine. Can endure long periods of drought and requires little or no cultivation. It never attains a very great height, but grows compact. The needles are long, hard and glossy, allowing but little evaporation from their surface. The Ponderosa Pine is adapted to planting in semi-arid regions of the west.

Transplanted, 4— 8 in.	.13	.80	5.00
“ 8—12 in.	.15	1.00	7.00

PINE—*Pinus sylvestris*,—SCOTCH.

Like the Austrian Pine, the Scotch Pine is a native of Europe. Is a very rapid grower having a rather light green color. On account of rapidity of growth, its extreme hardiness, and ability to grow on poor soil, it is very valuable as a windbreak tree. Also suitable for ornamental purposes.

	Each	10	100	1000
Transplanted, 8—12 in.	.10	.60	5.00	40.00

Evergreens form a very effective screen.

PINE—*Pinus Strobus*,—WHITE.

White Pine is the standard forestry tree of the North and East. It is very sturdy, long lived, and a rapid grower. We recommend it highly as a wind-break tree, and individual specimens make a pleasing ornament.

		Each	10	100	1000
Transplanted,	4— 8 in.	.04	.25	1.50	12.00

"	18—24 in.25	2.00	15.00

White Pine.

SPRUCE—*Picea Pungens*,—COLORADO BLUE.

The contrast between the color of this well known spruce and other evergreens affords a pleasing variety so essential to effective ornamental plantings. It has a beautiful steel blue color. Perfectly hardy anywhere.

Colorado Blue Spruce.

The temperature inside this windbreak in the winter is from 40° to 50°
In summer no cooler place can be found

SPRUCE—*Abies nigra*,—BLACK.

A beautiful symmetrical evergreen with dark green foliage. Grows compact and is especially adapted to lawn and park, although it is used extensively as a shelterbelt tree.

		Each	10	100
Transplanted,	6—12 inches	.20	1.50	9.00
"	3—4 feet	1.50	12.00
"	5 feet	2.00

SPRUCE—*Picea Englemanni*.—ENGLEMAN'S.

Seedlings, 4—8 inches, each .20

SPRUCE—*Abies alba*,—WHITE.

Has a light colored aromatic foliage. Strong and exceptionally hardy. Is very compact and symmetrical. The White Spruce and the Norway Spruce are the two best "all around" evergreens. They can be utilized for almost any one of the many uses to which evergreens are put.

		Each	10	100	1000

SPRUCE—*Picea Pungens*,—(Grafted Blue Spruce).

Transplanted, 2 feet, 3.00 each, balled and burlapped.

to four degrees warmer than that of surrounding territory.
to the shade offered by these evergreens.

SPRUCE—*Picea excelsa*,—NORWAY.

Probably the most widely planted of all evergreens. Its rapid and compact growth, immunity from disease and adaptability to almost any soil or climate, make it probably the best windbreak tree known. Individual trees in our nursery have made as much as three feet of growth in height in one season. When given room to develop it is compact and symmetrical, making it valuable as an ornamental. Our stock of this variety is exceptionally fine, and no one will regret having planted a Norway Spruce.

Proof o' the Puddin'

"Can Recommend Them Highly."

"The 100 White Ash seedlings I bought from you in the spring of 1914 are doing fine as 94 lived and some made a growth of nearly two feet and this summer a little better. Can recommend your trees very highly."

Stoner Frank, Ephrata, Pa.

"Packed in Excellent Manner."

"Just a line to express my gratitude for the shipment of Arbor Vitae last spring—which were delayed on the road almost three weeks and if it were not for the excellent manner in which they were packed, they would have been a total loss. Out of 500 trees not a single one has died"

John Boeck, M. D., Boise, Idaho.

"I can certainly recommend your trees to any one, especially any one who wants good trees."

E. D. Yost, Wilson, Kans.

"In Fine Shape."

"Enclosed find Money Order in payment for the evergreens I received. The trees were in fine shape and are looking nice and promising now."

Stephen L. Willey, Holmen, Wis.

"My order received in fine condition. Thank you for promptness."

Geo. Kurfiss, Salina, Kans.

"Satisfactory in Every Respect."

"It affords me great pleasure to say to you that all of the stock you have shipped me this spring was well packed and arrived in good condition and is satisfactory in every respect.

If am in the market for any more trees another year, you will certainly hear from me."

Joy Morton,

R. R. Exchange, Chicago.

OUR FORESTRY DEPARTMENT.

The value of wood lots and forest plantations on the farm is beginning to be fully appreciated. There are but few farms that do not have some waste land that is either too rough or too wet to work. This idle land is a loss to the farmer for he must pay taxes on property that brings him no income. But this land can be made valuable by planting it to forest trees. The cost is not much nor is it necessary to wait many years for returns. Such plantations usually furnish enough firewood and fence posts in a few years to pay for their costs many times over. Once planted, a wood lot needs but little attention and it will increase the value of your farm as no other investment can.

We have established our FORESTRY DEPARTMENT to aid you in starting your wood lot. Tell us the amount of waste land that you have and the nature of it and we will tell you the best varieties to plant, the number required and the approximate cost. This will obligate you in no way whatever. The service is absolutely free.
